

DIY LED Light Project: A Simple Guide to Building a Custom Light

1. **LED Light Project:** This project involves building a custom light using an LED strip. The LED strip is a flexible strip of light-emitting diodes (LEDs) that can be cut into individual segments. The project involves connecting the LED strip to a power source and controlling the light. The project is suitable for beginners and can be completed in about 30-15 minutes. The project uses AA (alkaline) batteries.
2. **LED Light Project:** This project involves building a custom light using an LED strip. The LED strip is a flexible strip of light-emitting diodes (LEDs) that can be cut into individual segments. The project involves connecting the LED strip to a power source and controlling the light. The project is suitable for beginners and can be completed in about 30-15 minutes. The project uses AA (alkaline) batteries.
