[illegible]

The diagram illustrates a memory layout or stack structure. It consists of two rows of rectangular boxes. The top row contains 20 boxes in total; the 8th box from the left is highlighted in yellow, while all other boxes are white with blue outlines. The bottom row contains 6 boxes, also with blue outlines. A horizontal line connects the first four boxes of the bottom row, suggesting they form a contiguous segment or are part of a single logical unit.
